experience

With more than 25 years of experience in hardware and software development **RT-Systemtechnik GmbH** is one of the leading electronics OEMs in the vehicle and special vehicle construction as well as in the agricultural and construction machinery sector. Our core competence is the development and series production of operating and control devices as well as camera systems. Shape the future of the agricultural and construction machinery industry with us and become part of our dedicated team.

We are looking for someone to strengthen our team

Hardware developer (m/f/d) mobile / vehicles electronics

Your tasks

- Design and creation of digital and analog electronic circuits or embedded systems with a focus on power supply, microcontroller technology and display control
- Integration of interfaces for external sensors / actuators
- You are responsible for the holistic implementation of requirements, module design, integration, verification and validation
- You accompany the development from prototype to series production as part of the project team

your profile

- a degree in electronics, communications engineering or a comparable qualification
- You have a broad technical understanding, experience in analog / digital circuit technology, circuit simulation and measurement technology
- ideally, you already work with Altium or Eagle
- You recognize problems and can work on them independently and in a solution-oriented manner
- You find it easy to communicate in English
- Strong communication skills, the ability to work in teams & initiative round off your profile

We offer

- an independent, versatile and responsible job in a growth-oriented strong industry
- extensive training, personal and professional development opportunities
- attractive and performance-oriented remuneration
- flexible working hours (flexitime)
- attractive benefits
