experience

With more than 25 years of experience in hardware and software development **RT-Systemtechnik GmbH** is one of the leading electronics OEMs in the vehicle and special vehicle construction as well as in the agricultural and construction machinery sector. Our core competence is the development and series production of operating and control devices as well as camera systems. Shape the future of the agricultural and construction machinery industry with us and become part of our dedicated team.

We are looking for someone to strengthen our team

Service technician

Commercial vehicle electrics (m/f/d)

Your tasks

- Installation and maintenance of vehicle safety technology such as camera monitor systems, environmental detection and LED technology
- Creation of customer-specific solutions in collaboration with customers, product management and development
- technical support on site, by phone or by email
- You are the first point of contact for our customers and our sales staff in all technical questions
- technical training of sales staff and customers

Your profile

- completed training as a vehicle mechatronics engineer / electrician or a comparable qualification
- You enjoy working with the very latest technologies and tools
- You are reliable, committed, have strong communication skills and are a team player
- You enjoy visiting customers on site (nationally) and have a class B driving license
- understanding documentation written in English is no problem for you

We offer

- an independent, versatile, responsible job in a growth-oriented strong industry
- extensive training, personal and professional development opportunities
- attractive and performance-oriented remuneration
- flexible working hours (flexitime)
- attractive benefits
